* The Surrender Value and Death Benefit shown in above Summary Illustration have been calculated based on the net rates of return. The net rates of return are net of fund charges levied by fund houses which vary with different funds. Assuming the fund charges are [1.50%] p.a., the gross rates of return on the underlying assets of the funds used in this Summary Illustration are therefore [1.50%] p.a., [4.50%] p.a. and [7.50%] p.a. respectively. For details of fund charges please refer to the offering documents of the funds. Please note that this illustration might not be relevant should you subsequently switch funds. Please kindly refer to your advisor for the further details. If you select a money market fund or a fixed income fund, then above returns in the growth scenarios would be considered high in many cases and unlikely to be achieved if low interest rate environment persists. You are strongly encouraged to speak to your financial adviser who could provide further information on these funds - both for your initial fund selection and subsequently.

[Under the assumed rate of return at 0% [and b%] p.a., your policy will remain in force up to an attained age of x [and y] of the individual insured respectively. The policy will terminate afterwards. Your policy may also terminate under other adverse investment scenarios. If the actual investment return is below the above assumed rate of return, the policy may terminate earlier than above attained age(s). You could lose all your premiums paid and benefits accrued if any condition of automatic early termination is triggered.]

Warning: *You should only invest in this product if you intend to pay the premium for the whole of your chosen premium payment term. Should you terminate this product early or cease paying premiums early, you may suffer a significant loss.*

Declaration

I confirm having read and understood the information provided in this illustration and received the principal brochure.
