* Following the definitions of HKEX,

- H-share companies refer to companies incorporated in the PRC and approved by the CSRC for a listing in Hong Kong. The par value of the shares of these Chinese enterprises is denominated in RMB, and the shares are subscribed for and traded in HKD or other currencies.
- Red chip companies refer to companies which
 - have at least 30% shareholding held in aggregate by Mainland China entities, and/or indirectly through companies controlled by them, with the Mainland China entities being the single largest shareholders in aggregate terms. Or
 - if the shareholding of the company held in aggregate directly and/or indirectly by Mainland China entities is below 30% but is 20% or above and there is a strong influential presence, on a judgemental basis, of Mainland China-linked individuals on the company's board of directors. Mainland China entities include state-owned enterprises, and entities controlled by provincial and municipal authorities.

** As some red chips and H-shares are also HSI constituents, figures reported in this table are not exclusive
